
CHLORIDE ZINC PLATING PROCESSES

GALOX AZ 753	A aqueous based chloride zinc plating process with brilliant deposits, high temperature stability economical to use.
GALOX AZ 754	A rack and barrel chloride zinc plating process with brilliant deposits Very versatile performance.
GALOX AZ 755	An economical Chloride zinc rack and barrel plating process of high stability; tolerates temperatures up To 50 C and high load. A very versatile process.
GALOX AZ 756	A high performance new generation boric acid free chloride zinc plating process. Produces brilliant coatings. Ideal for barrel and rack plating applications.
