
DESCALERS / DERUSTERS / INHIBITORS / ELECTROPOLISHING

SURTREAT 201	A Dry acid salt activator to be used with sulphuric acid or mixture of acids, Accelerates descaling of steel.
SURTREAT 202	A Dry acid salt activator for zinc die casting & Aluminium. Can be used with or without acid.
SURTREAT 203	An accelerator for descaling and decarburising of steel. Can be used with acidic or alkaline non cyanide media most suitably in combination with SURTREAT-119 .
SURTREAT 204	A Phosphoric acid based pickling of steel in immersion and manual application. Also suitable for aluminium and its alloys.
SURTREAT 205	A non foaming Phosphoric acid based deruster for spray application.
SURTREAT 206	An inhibitor for mineral acid pickling, reduces hydrogen embrittlement.
SURTREAT 207	An additive to be used with phosphoric acid for electropolishing of stainless steel.
SURTREAT 208	Acid Non fumer for pretreatment of steel in Plating lines.
