

PRODUCT DESCRIPTION

IMMERSION / ULTRASONIC / SPRAY METAL CLEANERS

SURTREAT 110	A Low temperature immersion ultrasonic mildly alkaline cleaner for ferrous-non ferrous metals, high oil absorption.
SURTREAT 111	A Low cost alkaline ultrasonic cleaner for iron & steel parts, high oil absorption.
SURTREAT 112	An Ultrasonic emulsifying cleaner for all substrates. Specially suitable for cleaning of aluminium and zinc dye cast.
SURTREAT 113	An Ultrasonic cleaner for removal of lapping and polishing pastes and Oxide layers from copper and alloy.
SURTREAT 114	A Universal cleaner especially suited for the removal of hard polishing composition from all materials. Very good temporary corrosion protection.
SURTREAT 115	A soak cleaner for iron and steel. Suitable for the pretreatment in plating lines.
SURTREAT 116	An Economical spray cleaner for iron and steel. High cleaning effect with very low foam formation and good corrosion protection.
SURTREAT 117	A Liquid, sprayable immersion cleaner for all substrates. Suitable in hard water, demulsifying, with temporary corrosion protection
SURTREAT 122	An additive to be used with caustic soda for immersion cleaning of Iron & Steel
SURTREAT 012	A surfactant booster for spray cleaning process. Ideal for cleaning of industrial plastic bins.
SURTREAT 014	A surfactant booster for spray cleaning of machined steel parts, dimensionally critical .
SURTREAT 017	A surfactant booster for immersion cleaning process.
