
TRIVALENT CHROMATE CONVERSION COATINGS

- * **TRICOAT 330** Trivalent, temper resistant blue passivation; normal corrosion resistant, coatings of intense blue colour, Long lifetime.
- * **TRICOAT 331** Trivalent temper resistant blue to silver appearance passivation with high corrosion protection, which can further be enhanced with top coats.
- * **TRICOAT 332** Room temprature Trivalent chrome yellow passivation without hexavalent chromium. Produces pale, iridescent green coatings of higher corrosion protection comparable to hexavalent chrome yellow passivation.
- * **TRICOAT 333** Trivalent Chrome black passivation for zinc and zinc alloy coatings. Produces uniform glossy coatings in combination with resin coat, Koroseal 443/444, Provides good corrosion protection.

* **ELV/ RoHS/WEE** Compliant
